THE UNTOLD TRUTH ABOUT TONER CARTRIDGE RECYCLING

WHERE ARE YOUR USED CARTRIDGES GOING?

Certified Service

Did you know?

- **100 lbs** is the amount of waste a typical laser printer creates in one year
- **70%** is the percentage of used cartridges that go directly into trash cans and are not recycled
- **1,000 years** is the amount of time it takes for a print cartridge to decompose in a landfill site

60-80%

ARE PLACED IN TRASH CANS AND GO DIRECTLY TO LANDFILL

20-40%
ARE RECYCLED

RECYCLED PRODUCTS

HANGERS

Our Complimentary **Zero Landfill Program**

Rather than burn, export or dispose of unwanted end of life components into landfill sites, the **Zero Landfill** methodology leverages exclusive technology and world class engineers to extend and intensify the typical recycling process. This ensures 100% of all cartridge components are properly extracted to be reused and avoid landfill.

If you're unsure of the true environmental impact of your current cartridge recycling process, let us introduce you to our exclusive **Zero Landfill** program – contact us today!
